Accreditation Management Systems (AMS): A Secure System for Events and Venues

Frequently Asked Questions (FAQs)

What is the Accreditation Management System (AMS)?

The Accreditation Management System is a robust, tailored cloud-based software solution designed to manage events and/or venue security with precision and efficiency. It simplifies access controls and ensures a secure environment, accommodating unique security needs.

Is the AMS scalable for different event sizes?

Yes, our system is highly flexible and scalable, making it suitable for events of all sizes, from small local gatherings to large-scale international events, including sporting events, concerts, festivals (e.g. music and food festivals), trade shows and expos, product launches, government conferences, regional conferences, diplomatic events and national events such independence and other celebrations. We adapt our services to meet your specific requirements and budget.

What types of support do you offer for accreditation management?

We provide turnkey support that includes software, training on the use of the system, on-site management, badge production, zoning access and guidance. Our services are flexible, so you can tailor your needs and choose as much or as little support as your event requires. Regardless of the level of support required, the AMS provides robust tools to monitor and manage security effectively, including modern security concerns.

Is the system easy to use for non-technical users?

Absolutely. Our system features a user-friendly interface that is simple to set up and use, even for individuals without technical expertise. Our team offers full support to ensure a smooth experience.

Can your system integrate with our existing infrastructure?

Yes, the AMS and its underpinning software and tools will seamlessly integrate with your existing systems, eliminating the need for major overhauls or changes to your existing infrastructure.

How does your system address modern security concerns?

Our system is designed to address a range of security concerns that can arise, including health risks or medical emergencies, cyber threats/attacks, other emergencies, technological failures, among others.

What makes the AMS stand out among other accreditation solutions?

The AMS stands out due to its turnkey support, ease of use, seamless integration with other systems, and scalability. These features ensure a tailored, efficient solution for any event or venue.

Can the system manage badge production?

Yes, we offer comprehensive badge production as part of the accreditation services. This includes designing, printing, and issuing badges that align with your security and branding needs.

How customizable is the system for specific event needs?

Our system is highly customizable and can be tailored to address the unique security requirements of your event or venue.

How can I get started with the AMS?

To get started, contact our team via our website to schedule a demo. We will provide a tailored solution to meet your event's unique requirements and guide you through the setup process. Contact us via email at info@softtribe.com or our website at softtribe.com to schedule a session.
